

Research Assistant – Entry Level

1.0 FTE position (37.5 hours per week)

Posting Date – September 8, 2026

Open Until Filled

Reichert and Associates is committed to employment equity and encourages applications from all qualified candidates. To read our [statement on equity](#) please refer to our website.

Summary

We are a growing research and evaluation firm based in Vancouver. A significant part of our work is in health care where we support the evaluation of programs and services intended to improve both access and outcomes. We work in an open and flexible environment and that promotes collaboration and learning across team members.

Reporting to one of the firm's Research and Evaluation Analysts, the successful candidate will provide overall project support. Ideally, you have completed a university degree in health or social sciences. You are detail-oriented, have a strong interest in social and health research, want to work in a fast-paced environment, want to learn, are supportive, and are able to work collaboratively.

We take pride in providing a supportive work environment. We offer a competitive compensation package that includes extended health and wellness as well as learning opportunities and bonuses. We support an inclusive work environment and subscribe to the principles of the "living wage."

Additional information about us can be found at www.reichertandassociates.ca

Required

- University degree
- Interest in working within a social or health research environment
- Excellent spoken and written English communication skills
- Strong attention to detail and extremely organized
- Ability to problem-solve complex issues
- Exceptional MS Office skills (Word, Excel, Outlook and PowerPoint)
- Ability to work collaboratively and support the work of team members
- Strong interpersonal skills
- Ability to work with confidential information
- Experience with or working knowledge of both quantitative and qualitative research methods

Considered an asset

- Experience working within a social or health research environment
- Experience with data entry
- Working knowledge of statistical software (e.g., R, Stata, Excel, SPSS)
- Previous experience with survey platforms (e.g., Simple Survey, SurveyMonkey etc.)
- Ability to work with Adobe suite (e.g., InDesign, Acrobat, Illustrator, Photoshop)

Primary responsibilities

Generally, you will be supporting the evaluation efforts of programs that are designed to improve health care access and outcomes.

- Data entry
- Transcribing interviews
- Conducting literature reviews
- Conducting data analysis (descriptive statistical analysis and thematic analysis of qualitative data)
- Scheduling meetings and interviews for research team members
- Supporting the development of user-friendly data summaries, fact sheets, briefing notes, presentations, newsletter content, etc. containing evaluation findings
- Formatting and editing documents
- Providing overall logistical support to the team and assisting with other research activities as necessary
